Manuj Aggarwal

AI Keynote Speaker on Human Judgment & Decision-Making

Manuj Aggarwal is an AI inventor and the founder of TetraNoodle Technologies who combines AI with neuroscience, the science of sound and voice, and how beliefs and decisions form, to help people think more clearly and act with better judgment under pressure.

He is a named inventor on four AI patents and has published research in the Mensa Research Journal.

ON STAGE | KEYNOTE SPEAKER

30 YEARS	4 AI PATENTS	MENSA RESEARCH
Building enterprise systems	Named inventor	Published research journal

Signature Keynotes

LEADERSHIP / HUMAN JUDGMENT / APPLIED AI

01

Intelligence Is on Tap. Judgment Isn't.

Core leadership conference keynote. Explains why fluent AI answers are not the same as good decisions, how to separate lookup from human choice, and how leaders keep responsibility in the room under pressure.

02

Human General Intelligence in the Age of Borrowed Knowledge

Explores the human capacities that still matter when information is cheap: thinking clearly, staying steady, learning, relating, and acting with judgment as demands change.

03

How Leaders Use AI for Better Decisions

A practical five-step method for CEOs, founders, and senior leaders: name the decision, separate lookup from judgment, borrow with a brief, notice pressure, and keep human direction.

04

Judgment Under Pressure for Sales and Revenue Leaders

Built for CROs and VPs of Sales. Focuses on priority, timing, negotiation, and coaching - using borrowed intelligence without handing away the forecast or difficult conversations.

Background & Credentials

SELECTED EXPERIENCE

- 30 years building enterprise systems for organizations including IBM, Microsoft, and T-Mobile.
- Named inventor on four AI patents in human-AI decision systems.
- Published research in the Mensa Research Journal.
- Degree Compass (D2L): Led the engineering that turned Degree Compass into a full product for Desire2Learn (D2L), technology later praised by the Obama White House.
- Author: Learn Apache Mesos and Network Security with pfSense (Packt, 2018).

FORMATS 30, 45, or 60-minute keynote / 90-minute executive briefing / Half-day working session (in person or virtual)
